

Two Phases Of Action In US Foreign Policy And Foreign Affairs

Integrated At Each COCOM As The Joint-Force, And Including The Penta-Force

The first time a fellow comes at you, you don't scratch his cheek, you break his jaw. The second time he comes at you, you don't put him in the hospital, you put him in the morgue. This is how you earn respect in your neighborhood and walk with prestige – which is to say, safety – among your fellow creatures of this breathing world.

These two phases of action comprise the structure of US foreign policy and the function of US foreign affairs. That's all there is to it. The whole of USG prepares for, plans for, budgets for, maintains, and operates these two phases of action in US foreign policy and foreign affairs. That's all they do. These two phases of action are the supreme and perpetual guidelines for the whole of USG in all US foreign affairs of state, forever:

if they hit you once, you break their face;
if they hit you twice, you break their neck.

We have outlined a [revolution in US foreign affairs](#) wherein [US Combatant Commands \(COCOMs\)](#) are the [chief forward presence](#) of US foreign policy and therefore of US foreign affairs. Each COCOM comprises the integrated force of all three assets of US statecraft: Diplomacy, Finance, War-Fighting. This integrated force, fully present as and at each COCOM, is known as **The Joint-Force**. Ignore civilian think tanks. They are tendentious and not infrequently bumptious.

The War-Fighting component of The Joint-Force comprises a force integration of the five branches of US Armed Force, to be known as **The Penta-Force**: Space, Air, Word (Cyber), Sea, and Land Forces (SAWSL / SACSL).

Authority to deploy these two phases of action in US foreign policy and foreign affairs reposes with POTUS and the COCOM Commanders.

Meddling about in other nations' affairs, skulking around their chancelleries, stirring discontent among their citizens, terrorizing their mothers and daughters, looting and murdering foreign nationals for the fun of it, self-financing by extortion, assassination, and black-market enterprise, conducting IO against one and all just to keep sharp at it, bribing and otherwise co-opting professionals, inflating and crashing economies, engineering *regime changes* this place and that, incarcerating and torturing under color of legal intelligence gathering . . . infamies such as these USG abjures while also abolishing agencies – e.g., CIA, USAID, FBI – who conduct them.

US foreign policy and foreign affairs, conducted entirely through The Joint-Force comprising the COCOMs, have **two grand national strategic objectives**:

First, hold open, fair, and reciprocal all five types of communication – space, air, cyber, water, land – between US citizens and countries whose citizens wish to trade with them.

Second, preserve, protect, and defend the sovereign personal and national peace and freedom of US citizens and states – and *only their* sovereign personal and national peace and freedom.

In short, the grand national strategic objective of The United States Of America is: preserve, protect, and defend the U.S. Constitution.

Functions Of The Executive Departments

State, Treasury, and Defense Departments function as second echelon, Deep Staff ("D" or "DS"), for COCOM Commanders. From their areas of expertise, State, Treasury, and Defense provide staff support, second echelon, to those Commanders. That would be in Personnel D-1, Intelligence D-2, Operations D-3, Logistics D-4, Plans D-5, Signals D-6, Training D-7, Finance D-8, and Civilian / COCOM Cooperation D-9.

POTUS via COCOM Commander intentions guide Executive Department actions. Those intentions are unique because COCOM Commanders face unique geographies. State, Treasury, and Defense prepare, organize, and produce accordingly to supply COCOM Commanders' needs.

At Defense, for example, because The Penta-Force is the war-fighting component of each COCOM Commander's Joint-Force, branch chiefs and secretaries plan and budget for The Penta-Force, not for their Department or Branch. One Department, one plan and budget for The Penta-Force.

In the same way, at State and Treasury, leaders of their action agencies plan and budget for the diplomacy and finance components of each COCOM Commander's Joint-Force, not for their Department or agency.

COCOMs and Executive Departments run best, attract, and retain the best talent when their organization charts are sparse, simple, direct, and as nearly flat as can be accomplished and still get the job done. HR departments are job eliminators, not job definers, creators, or fillers. Executive Branch budget committees reduce expenditures to essentials inhering in POTUS' / COCOM Commanders' grand national strategic objectives rather than expand expenditures to dilute responsibilities

abjured by bureaucrats and / or goose sales lobbied by defense contractors and suttlers.

The fewer the cooks, the better the meal.

Light Infantry are the backbone of Land Force. Fast Destroyers are the backbone of Sea Force. Short Codes are the backbone of Word (Cyber) Force. Strike Fighters are the backbone of Air Force. Inaudible Waveforms are the backbone of Space Force.

Expect COCOM Commanders to manifest these realities in their willingness to serve, situational awareness, strategic assessments, tactical assignments, statements of intention, requests for funds, budget priorities, orders of battle, selection of commanders and aides, and production of command histories.

In illustration of the extant situation is this lame missive: [Winged Luddites: Aviators Are The Biggest Threat To Carrier Aviation](#)

I commented:

FWIW, I take the writers' point. However, until the five branches of military force produce a single, integrated budget designed to serve the needs of COCOM Commanders, the writers' disquisition imports parochially, not nationally. Who let Air Force and Navy go their separate ways *in re* drones? That person is a real culprit, more so than any service chief.

[Missing in the writers' plaint is a *coup d'œil*, a professional appreciation of the full situation their plaint populates.]

What is not self-evident is not convincing.

Power And Freedom

To unite power and freedom is another way to describe the US grand national strategic objective. To unite power and freedom is also the strategy and tactics of the US grand national strategic objective. *Grand national strategic* means *strategy+tactics*. *Grand national strategic objective* means *power+freedom*. For contemplating US grand national strategic objective, *strategy+tactics* and *power+freedom* are one and the same thing: unite power and freedom to preserve, protect, and defend the U.S. Constitution.

Power is monopoly of the will and ability to conduct victorious Joint-Force operations. Victorious Joint-Force operations compel an enemy's unconditional surrender in, on, over, under, around, and through an expanse of land, whether national domestic or national foreign.

Freedom is loyalty to the mother nation, deference to the penultimate authority of leaders and the offices they discharge as well as faith in the ultimate authority of Almighty God, before Whom individuals – including their leaders – and nations stands alone for judgement.

Power unites with freedom, and freedom with power, when a nation's citizens do not demand leaders with ultimate authority – an impossibility – and leaders do not assert ultimate authority for their persons or offices – an insanity.

A citizenry whose faith is in God, who are loyal to their mother country, and whose leaders foster knowledge of the ultimate authority of God and the penultimate authority of themselves and offices they discharge, must accomplish their nation's grand national strategic objective because they unite in their persons power and freedom. Of such is made a Golden Age of History such as the peak of the High Middle Ages, [1212 AD](#).

Item Elements Of USA Grand National Strategic Objectives

- 1-** Secure and legalize USA borders and construct and maintain Three Brothers plus Two as plenary regulator of earth-wide communications.
- 2-** Maintain USA diplomatic, financial, and military strength sufficient to occupy and culture-splice two major enemies simultaneously, one across the Atlantic (Iran / Moslem Brotherhood), one across the Pacific (PRC). Her two coasts force USA into unavoidably two-front wars.
- 3-** Unbind and unburden US citizens and states WRT self-guided religious, moral, and cultural destiny – true multi-culturalism.
- 4-** Eliminate the trade in psychotropic drugs, to include marijuana, earth-wide – true peace, love, groovy.
- 5-** Accept emerging national sovereignties and alliances. Oppose not spontaneous creation of sovereign nation states or autonomous execution of nations' affairs – true multi-polarity.
- 6-** Focus vectors of US military, diplomatic, and financial action on convergent missions at single objectives rather than divergent missions at multiple objectives. Be single-pointed until an objective is achieved.
- 7-** Fight to unconditional surrender of the opposing force or forces and commemorate victory in war as a military event with military oversight and decision *in re* timing, location, content, and outcome – true humility.
- 8-** Abolish CIA and transfer their activities, of which there are few, that benefit Americans to the COCOMs – true peace process.

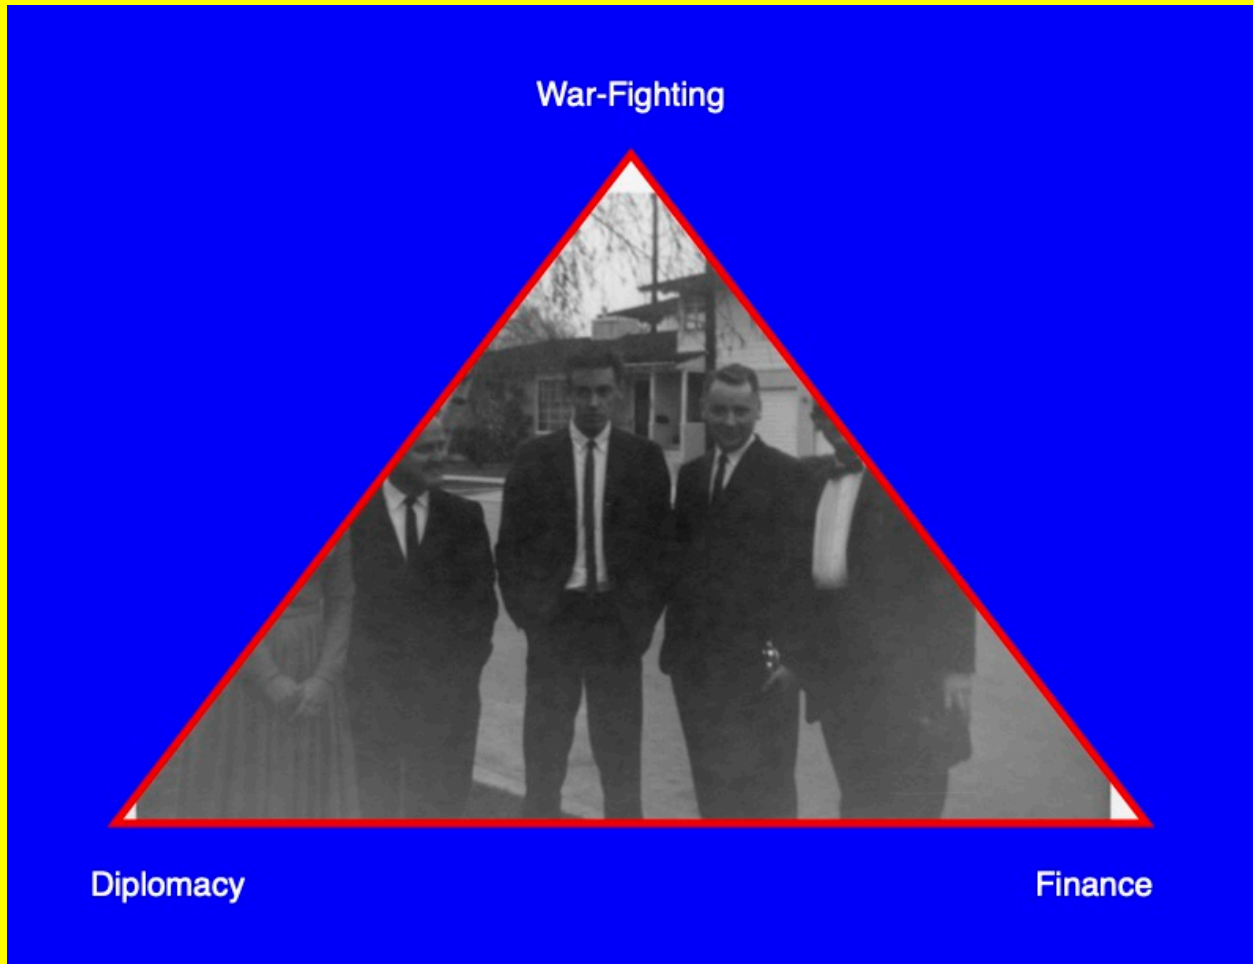

9- De-militarize, de-politicize, de-weaponize, severely downsize, and abolish US federal civilian bureaucracies, and encourage states to do likewise – true de-construction. Knee-cap the fascist beast through and through.

Note I: Culture-splice means intermarry with an occupied population, raise resulting children in the occupied country, but also bring spouses and children from the occupied country to the home country to grow the family there. This is the long-term and only method to eliminate aggressive impulses residing in an occupied country. An aggressive country should be occupied for as long as it takes to eliminate their aggressive impulses. War's very objective is culture-splicing with a militarily, diplomatically, and financially exhausted and surrendered country so that they do not again conjure aggressive impulses towards the country(s) who defeated them.

Note II: This grand national strategic objective, comprising these nine elements, would serve felicitously as the Platform of a [serious US national political party](#), which would be a **second** US political party, over against the [D-R UniParty](#).

Note III: The nations comprise not a community but a universe of individual natures and destinies. Let the nations turn to one not as a nation or zone of [global governance](#) but as a phylum comprising these many species. Let the universal metaphor for life and human affairs be botanical: [The Tree Of Life](#). A universe turns to one, one in spirit, one in love, not one in governance, not one in politics.

Note IV: USA, Russia and India: [Three Brothers Doctrine](#), the strategic alliance of core stewards of the destiny of the universe of sovereign nations.

The Glare Of Siva

The Joint-Force

Principles Of US Statecraft

Principle I

The United States have no interest in the domestic affairs of other countries and expect other countries to reciprocate by having no interest in our domestic affairs. The United States have interest in the lines of communication running between The United States and all other countries and expect all other countries to bear fairly and reciprocally the burden of keeping those lines open, safe, reliable, fair, and clean.

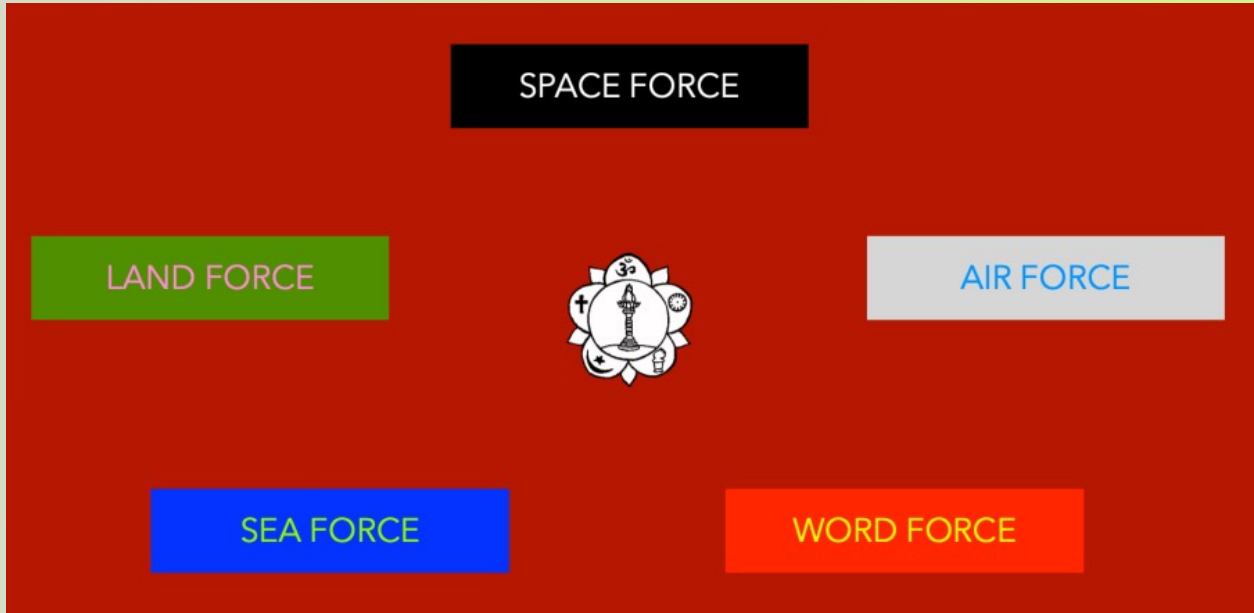

Principle II

The United States welcome alliance with our brother nations [India and Russia](#) for enforcement, from their perspective, of the ground of statecraft set forth in Principle I and urge Japan and Egypt to join us for that endeavor and commitment.

Principle III

An order to deploy which lacks or frustrates intent to compel a target to sign a declaration of unconditional surrender is an unlawful order by the Rules of Just War, the Conventions of War, Common Sense, and the Spirit of America. An order to deploy conveys this intent to the Commanding Officer: win this war / battle in a timely manner or do not come back alive.

**Being there is no reason for staying there.
Finish your job and go home in peace.**

The Penta-Force

Three Brothers Joint Operational Force Vectors

The next rational use of the US Joint-Force (Diplomacy, Finance, War-Fighting) lies on a primary vector pointing from Malta to Qom / Teheran executed by the newly-created [MEDCOM](#) (also [here](#)), and a secondary vector pointing from Tampa to Caracas, executed by the newly-created [CARIBCOM](#).

The next rational use of the Russian Joint-Force (Diplomacy, Finance, War-Fighting) lies on a primary vector pointing from Volgograd to Qom / Teheran and a secondary vector pointing from Novosibirsk to Ürümchi. This secondary vector can be half a pincer, the other half being Kazakhstan's movement on a vector pointing from Almaty to Ürümchi.

The next rational use of the Indian Joint-Force (Diplomacy, Finance, War-Fighting) lies on a primary vector pointing from Srinagar to Qom / Teheran and a secondary vector pointing from Siliguri toward Qinghai Lake.

Jumps made by these Three Brothers Joint Forces and their allies -- Israel, Jordan, Egypt, Saud, UAE, Japan, Colombia, Brazil, Italy, Greece, Mexico, Mongolia,, Argentina, Chile -- along the shoulders of these vectors, will catch up Shiite and [Salafi Jihad](#) allies -- Hizbollah, Hamas, [Moslem Brotherhood](#), Taliban, Pakistani ISI, [CIA](#), Venezuela and other Latin American drug cartels -- who fund themselves and the Iranian Mullocracy.

France and Israel would usefully conduct a pincer movement against Hizbollah in Lebanon with a view to returning that country to French Republican governance. French, Iraqi, Jordanian, and Russian force could usefully return Eastern Syria and parts of Northern Iraq to Syrian-Kurdish-[Yazidi](#) and Iraqi-Kurdish-[Yazidi](#) governance, respectively, to protect the French and Russian rears and the Iraqi and Jordanian flanks.

Under no circumstances should United Kingdom officers or citizens participate in these force vectors. The British Throne and Parliament never have accepted the decision of [Washington](#), [Lafayette](#), [Rochambeau](#), and [Cornwallis](#) at [Yorktown](#), VA in 1781. They probably never will. Whenever Americans are near them, British Officers subvert Americans' sovereignty, dissemble Americans' prestige, and attempt to co-opt Americans' lives and assets for service to British interests. The English do not respect Americans. They are not friends of Americans.

That defeat at Yorktown and its consequent and consequential loss of British wealth and prestige just rankles the British Throne and Parliament to this day, regardless their pretenses of gentility. Appreciate Americans will then English? Never.

Domestically, Americans have a big job waiting for them: get rid of the spooks. They are only trouble.

Spooks are trained to conjure chaos. They cause [VUCA](#). If you want all that on your dark side, then you deserve what they give you, because it's only going to be one thing, the one thing they're employed, trained, and know how to give you: **CHAOS!**

If spooks have "six ways from Sunday of getting back at you" (Chuck Schumer), spooks **are** the USG. And that's backwards.

Every domestic force vector in USA should point directly at Langley until the land there is returned to nature park status having children's playground equipment and a beautiful outdoor shooting range for everyone's fun and training.

Appendix

BLUF:

- 1-** Focus on removing the Iranian Ayatollahs from ~~governance~~ existence. This solves many problems afflicting many countries, to include traffic in psychotropic drugs legal and illegal.
- 2-** Fixing just the right – meaning hugely consequential – little things disappears many wrong – meaning hugely debilitating – big things.
- 3-** For success, identify and move on those specific very little things roiling the waters. Forget the big problems. In the departure of little pricks is the destiny of big problems.

For this to happen is needed much and indefatigable intellectual heavy lifting, which itself requires as prius a purity of heart. The needed work might also be called heavy hacking, as of its shell in order to reach a coconut's sweet milk and fruit. Such hacking requires the physical counterpart of a pure heart, namely, a steady hand, lest one hack off one's other hand or spill the coconut's milk on the ground.

I'm sure no one with an ounce of seriousness imagines that the Iranian Ayatollahs are anything but murderous and that their and POTUS Carter's laceration of American prestige has to be sewn together sometime, the sooner the better. POTUS Trump was making a fine beginning of that.

How many decades has it been since that horrible 1979, when the nations lost confidence in Americans because Americans' so-called leaders lost confidence in themselves . . . and have been lying about their self-betrayal ever since. What a horrible experience! What consolation by way of restoration is needed for it!

There is nothing wrong with Americans. We are a willingly good, pure-hearted, and cheerful people.

As Iranian Ayatollahs fall, Taliban have to fall back on Pak ISI, who really don't want them.

Eliminating the Iranian Ayatollahs from ~~governance~~ existence solves a lot of big problems facing a lot of serious nations. That one thing cascades good effects all over the earth.

When this is pointed out, nations will not long miss its truth and will act accordingly.

The task of eliminating Iranian Ayatollahs provides a splendid opportunity for putting [Three Brothers Doctrine](#) into practice.

Fake Mexican
