18 May 2024

**To: NATO Generals, Admirals, Colonels, and Captains**

Ladies and Gentlemen,

Your US American counterparts, their political officials, your political officials, your several cultural heritages, and many of your colleagues throw you at a force you cannot overcome, compete with successfully, win against, contain, weaken, degrade, or defeat:

The Russian Civilization-State.

Your mission, in the eyes of your US counterparts and NATO civilian officials, is to manage destruction of your commands, your countries, your countrymen, and yourselves so that US American financial speculators can preclude competition from real economies fostered by BRICS.

NATO is finished in any case. Your cultural responsibility is to dissolve it. Your military responsibility is to safeguard the national safety and sovereignty of your country's citizens. Russians would applaud your taking this course. Moreover, so would Arabs and Africans.

Forget about having TOEs for successful conflict with modern Russia. You will never catch up. Do not force Russia to mess up your makeup and dictate your terms of surrender. She would not do that unless you force Her to it. You are at best now, along with The USofA, a Tier III power in a poly-centric architecture of sovereign states.

**To: US American Generals, Admirals, Colonels, and Captains**

Ladies and Gentlemen,

Operationally, you answer to POTUS. Legally, you answer to Congress. Congress fixes and funds your TOEs. But you, **you** tell Congress what you need.

So, **so**, if you don't do that, if you don't mean what you tell Congress, if you don't know what you need, or if what you think you need does not comport with reality at home and abroad, you don't earn your pay and our country falls into dismemberment.

Your Pentagon is now a civilian Department chock-a-block with ignorant, incompetent, infantile, and malicious rent-seekers. Your TOEs, such as they are, subserve CIA-USAID-State Department ambitions, which are hegemonic and cultivated by US-UK QUANGOs and NGOs, aka CIA-MI6 fronts. These ambitions do not connect with Homeland USofA defense or electoral consent. They also do not connect with love and its conspicuous corporeality, broadmindedness.

At the apex of operational intensity during World War II, POTUS and Congress authorized seven four-star Officers: four Army and three Navy. Well into the wrap-up of World War II, POTUS and Congress handed out very many stars by way of reward rather than necessity. Today, POTUS and Congress authorize over forty four-star Officers managing far fewer TOEs than seven four-stars managed during the most intense fighting of World War II. None of you has knowledge or experience prosecuting modern war at scale. No TOEs you promoted or manage can operate successfully in that environment. You have failed your honor and your country.

You do not have a *peer adversary* because your country is an island and all spaces beyond her borders are under control of foreign geographies or powers. Today, you cannot get to a fight off the American Continent without permission, at least tacit, from other nations, notably Russia, China, India, and Turkey, but also including France, Egypt, Spain, Indonesia, Vietnam, The Philippines, Chile, Panama, and Brazil.

*Your days of marching at will over winds and waters are over.*

Granted, POTUS and Congress did this. But what did you advise them? Which of you, upon bumptiously tendentious badgering at a hearing by Members of Congress, removed your uniform coat, laid it on the witness table, and walked out upon announcing something like this:

Ladies and Gentlemen,

You have insulted me and my profession with questions that are trivial, hostile, and presumptive. I have insulted you and my profession by not being forthright with you about what I know regarding our national security interests and status.

I hereby resign my Commission as protest for your behavior against me and as penance for my behavior against you. My coat, bearing symbols of my rank and experience, lies before you and before me on this table you provide for me as a witness at this hearing. This is my answer to our mutual impertinence.

When you are ready to apologize, and you wish, and I am still alive, I shall return to answer honest questions with forthright simplicity. Against that day, Goodbye.

Give up global dominance.  
Other nations are not our business.  
Therefore, they are not your business.

**You are our Homeland Defense Force.**

Your suicide, retention, and enlistment figures are not those of *the most powerful fighting force in history*.

Your procurement record, including of human capital, befits, at best, a Tier III power in today's poly-centric architecture of sovereign states.

The industrial base of NATO *in toto* cannot match, much less exceed, in capacity or output, that of Russia or China, and soon enough, that of India.

You know perfectly well **why** you **cannot** replace the USS Bonhomme Richard.

If you say, **Budget**, I say, **Liar**.

Hero Of The Russian Federation  
Senior Lieutenant Of The Russian Marine Corps Ivan Zharsky

*Now, shall we dispense with the bull?*

We want craftsmen, not leaders.  
We need craftsmanship, not leadership.  
Leaders emerge naturally from craftsmen.

Give us craftsmen!  
Earn your keep!

The Russians have you out-schooled, out-thought, out-fought, and out-gunned. It starts with your being out-schooled.

Fix your schools!  
Make engineers!

National strategic objectives are very different from private commercial ambitions.  
Commercial ambitions are for private, corporate longevity and enrichment.  
Strategic objectives are for public, national safety and sovereignty.

The USofA is an independent, participating center  
in a poly-centric architecture of sovereign states.

You have at your disposal neither

	TOEs,	
required force,	unity of command,	<u>responsive industrial base,</u>
<u>engineering depth,</u>	professional competence,	a national Joint Force,
calculations of effectiveness,	escalation dominance,	theory of operations,
force protection,	EW-AD-SEAD,	management expertise,
fire productivity,	civilian morale,	combat effectiveness,
high course of education,	love for children and elders,	habit of life-long learning,
open-mindedness,	desire to hear the truth,	ability to see what's real,
<u>strategic-level coup d'œil,</u>	deep-bench operational skill,	resolution of uncertainties,
net-centric C4ISR,	COFM: correlation of forces and means,	moral courage,
<u>reconnaissance fire complex,</u>	operational initiative,	<u>reconnaissance strike complex</u>
nor serious code of honor fitting the conduct of modern war at scale.		

You place atop a self-destructing combination incapable of fulfilling their mission, and you refuse to address the fact. You obsess over non-essentials, slippery flummery, and compete for money instead of for strategic and operational fidelity to your trust.

Long since you could have argued POTUS and Congress for a US General Staff commanding one **actual** US Joint Force. The TOEs of The US Joint Force need no more than five Officers of four-star rank and nine or fewer of three-star rank. Your civilian TOEs are excessive by orders of magnitude. Your fierce focus on tactical depths, condemning scrutiny and learning of operational art and strategic objectives, locks you into perpetual panic because it blinds you to the fact that you have no safe rear area.

Your planners and commanders don't know, so they don't use, mathematics sufficient to calculate operations and their effects in realities you face on our nation's behalf. You have forgotten rudiments and nuances of military art you are paid to embody. You bellow hollow catchphrases crafted by self-promoting rattle-brain professors, financiers, and *think tank experts*.

You spurn the hard-bitten, unforgiving mathematics of modern war at scale. You dumb-down even your own successors, just to accommodate fads thrown up at you by parvenus in the art of statecraft, crude personalities who aim to **leave their mark**, as if we are a bus shelter or fire hydrant, or a freeway abutment.

Modern war requires comprehensive mathematics with **differential equations**. Vast data sets, comprising correlates of war **that are accurate**, must grind through truly relevant sets of VUCA equations . . . to create actionable VUCA to meet even more VUCA. And then again this afternoon, through the night into tomorrow morning, recalculate everything all over. This mindset maps the art of modern war at scale. Your legitimacy depends on your success with it.

NATO is finished. Your cultural responsibility is to help dissolve it.

Your military responsibility is to protect your country's citizens, US Americans.

**Make our Homeland Safe and Sovereign.** And keep us that way.

Russians would applaud your taking this course. More importantly, so would Arabs and Africans.

Your current catchphrase, **Competition Continuum**, announces a desire to reduce our national security and sovereignty to linearity, which is one-dimensional. This desire is infantile. It renders you inadequate in the conduct of modern statecraft through any of its three functions, diplomacy, finance, and war-fighting. Who ever heard of living life on a line, which is one-dimensional, much less a straight line **and only one of them**? On the other hand, who believes that life is a chaos merely which allows – nay, invites – one to lay on it any plan one cares to conjure? Not even children do that. Even as infants they have a sense of self-preservation.

The concept of *Proportion Continuum*, or alternatively, of *VUCA Compounding Continuum*, invites a petrified mind to explore pleasing acts of exhilarating generation.

**T H I N K**

[multi-variant systems](#)

[complex adaptive systems](#)

[nonlinear dynamical systems](#)

Consider, for example, a self-mobile/dynamic sphere, or better, dodecahedron, hosting inside itself  $n$  self-mobile/dynamic  $x, y, z$  axis coordinate systems such that the origins of the axes act as self-mobile/dynamic *Compounding Junctures* that resource and fabricate combinations and permutations of VUCA Values.

Ladies and gentlemen, it's going to take

**a lot of math,  
a lot of engineering,  
a lot of humility,  
a lot of high culture,  
and a lot of time**

to spin up USofA military architecture worthy of the name, which is say, ready **and able** to guarantee security and sovereignty to citizens of Homeland USofA . . . if at this point you even care to do that.
