Redesign For Homeland Defense

G7 and their constituent nations have flatlined. NATO and most of their constituent nations have flatlined. The powers of these organizations today are entirely destructive, nowhere constructive. The large majority of the world's population and the majority of the world's nations want them gone.

G7 nations have neither competencies nor capabilities to achieve peerage with the assets, architectures, or operating mechanisms — especially military ones — of the BRICS gathering of nations.

Today, the spiritual, moral, economic, and intellectual architectures of G7 nations epitomize the brutalist philosophy and political architecture of Euro-American [as distinguished from US-American] Globalism, which is allergic to national sovereignties because they obstruct Euro-Americans' loot of the wealth of nations.

God and the nations reject this political-economic-military architecture as unkind and careless, not what God wanted, and therefore not what nature long tolerates.

BRICS nations, led by three great powers — Russia, India, and China — build and expand an architecture of clarity and mutual benefit among sovereign nations, even nations of disparate power.

The USofA, a great power, must join the BRICS gathering of nations, put her shoulder to the common task of ensuring happiness through prosperity for each of the nations and all of their citizens all at once.
