An Architecture Of US
Executive Branch Departments
Inspired By US National Strategic Interests

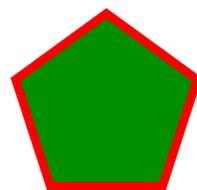

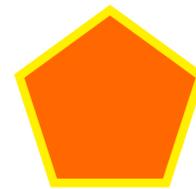

Foods
Education
Defense
Energy
Transportation

By rights, Departments of the Executive Branch of The US Federal Government should coincide with US national strategic interests.

To realize that truth is the motivation of this experiment.

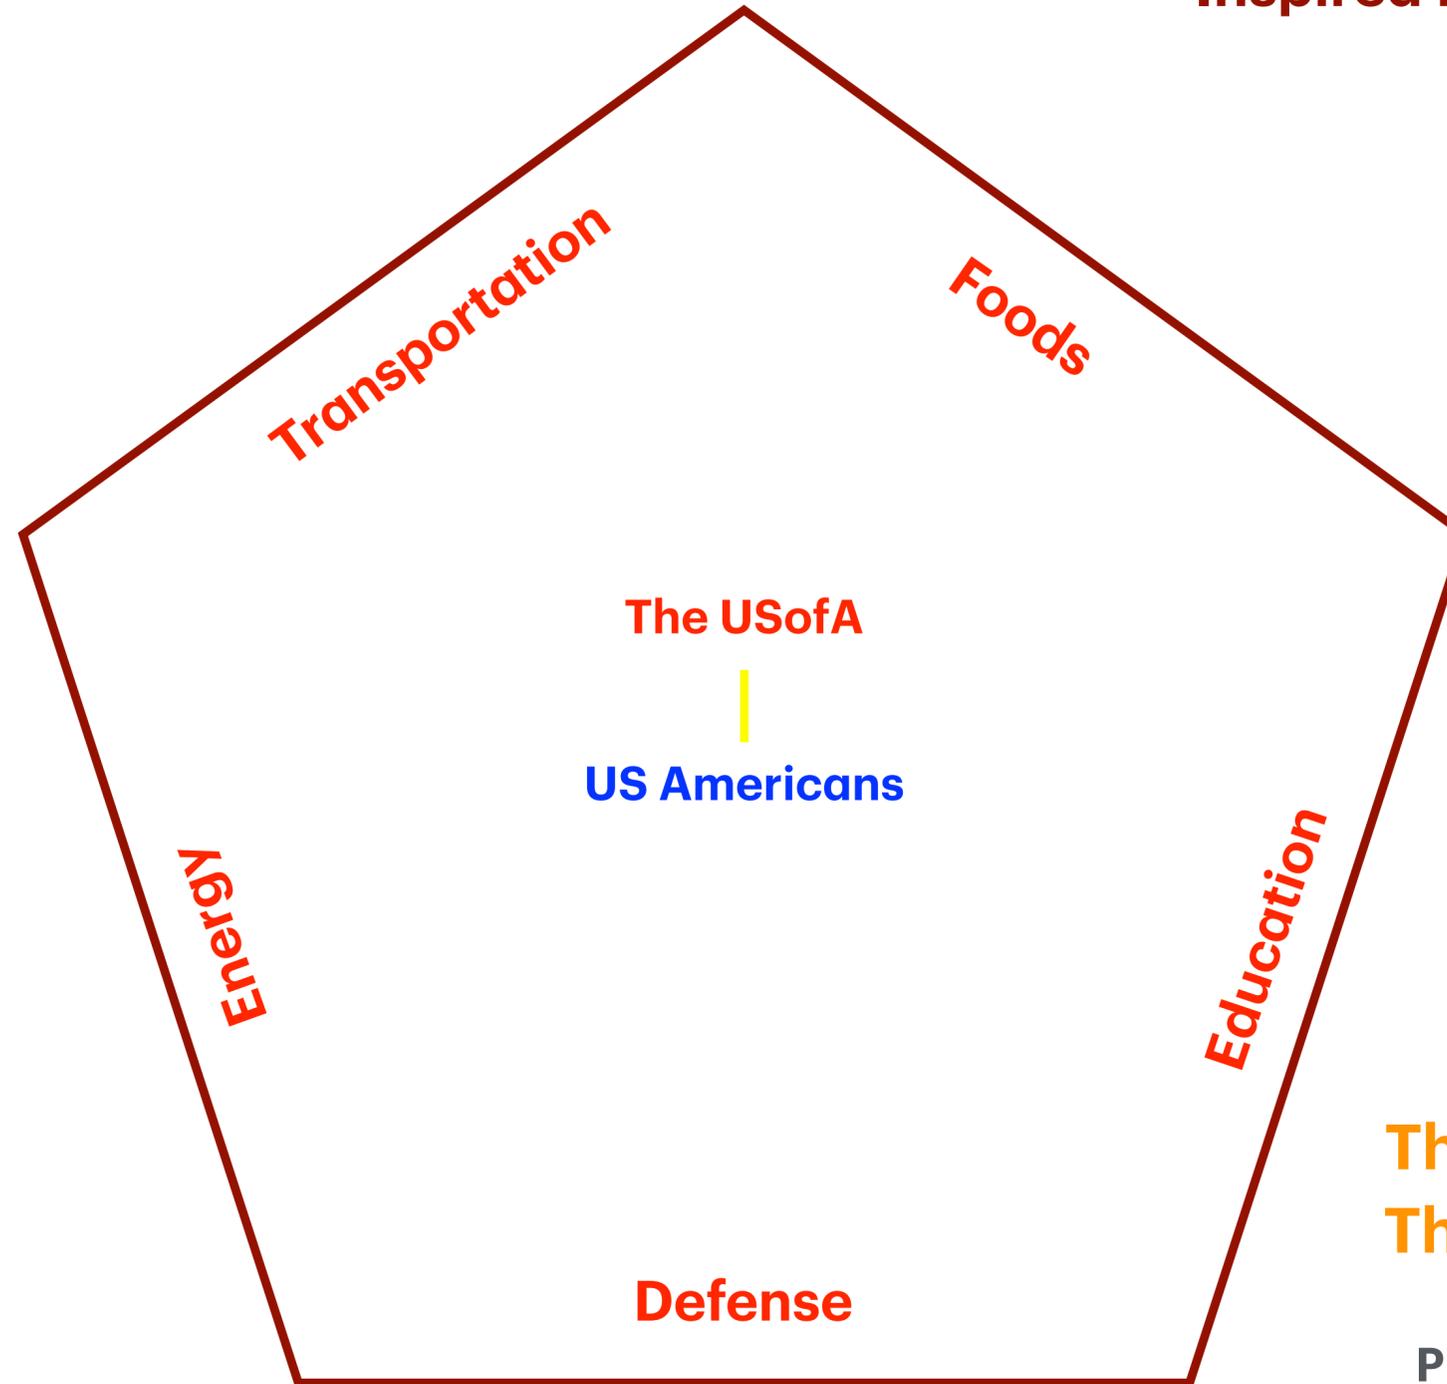

**An Architecture Of US
Executive Branch Departments
Inspired By US National Strategic Interests**

**The Categories
Of Being:**

Time
Space
Causality
Substance

**The Elemental
Principles:**

Space - Sound
Air - Touch
Fire - Sight
Water - Taste
Earth - Smell

**The Gunas,
Qualities:**

Satwa - Calm
Raja - Excited
Thama - Dull

**The Sheaths Which Enclose
The Inner Truth / Motivator:**

Annamaya - Material - Food
Pranamaya - Vital Energy - Breath
Manomaya - Mind - Thought
Vijnanamaya - Intelligence - Reason
Anandamaya - Bliss - Happiness

It is an engineering problem, and not just to design the Defense Department for XXI Century warfighting capability — when we are already over 20 years into the XXI Century! DOD is a customizable element of the Executive Branch. The Executive Branch, not DOD, is authorized by The Constitution.

The engineering problem is the Departments of The Executive Branch altogether. The Constitution does not specify these. It specifies some **tasks** -- not all that could arise -- but not formal **departments**. This reality tasks each generation to engineer formal Executive Branch Departments as needed by their times.

Using, in gratitude, lessons taught by Russians within and tangential to their borderlands SMO of 2022-2025, we can jump ahead, **simplify structures** even further -- using 5 and 3 as ground systems and 9 and 12 as resulting kinetic systems -- thus strengthening The USofA overall. We can also tailor our systems for what we can do -- peace-keeping on our own continent -- rather than what we cannot do -- warfighting on someone else's continent.

A man's got to know his limitations.
Magnum Force

The Executive Branch Departments are consistent with — indeed, are inspired by — the five **US national strategic interests: Food, Education, Defense, Energy, Transportation.**

Elemental Phenomenology = Engineering Considerations
= Qualities Of Objects And Subjects:
Height, Width, Depth, Movement, Sublimation

The US defense, energy, and transportation industries are US state property working under The US Departments of Defense, Energy, and Transportation.

Our mind finds it difficult -- and for some, impossible -- to see that God cares not for who is good and who is bad, but rather, for who is taking care of their business, whatever that is, in straight lines with the greatest possible resolve, skill, and scrutiny.

It is important to understand that the kinetic energy of an attack tends to deplete. To continue and build up efforts, new energy must be accumulated. This is achieved through the regrouping of forces.

One implication of this phenomenology, for us in our hyper-constrained epistemological capability, is that we forgive lest we take the same punishments as does the one who wrongs us. It's only practical.

Commands and Staffs at Brigade level and higher are Combined Arms Joint Organizations **responsive to** requirements of The Land Force.

Aspirational Fiction

By The Rev. David R. Graham

23 March 2025

To: Madam President Claudia Sheinbaum Pardo
President of The United Mexican States

From: Mr. President Donald J. Trump
President of The United States of America

Dear Madam President,

The Foreign Policy of The United States of America has transitioned from overseas offensive postures to homeland defensive ones.

In pursuance thereof, and starting now, The United States are assembling 4 Combined Arms Joint Force Field Armies on the [US-Mexico border](#). These will billet between California and Florida. Each Field Army will comprise 2 Corps. Each Corps will comprise 6 Divisions: 4 Active, 1 Reserve, and 1 Paper.

In the rear and reserve of these 4 Combined Arms Joint Force Field Armies will be 5 others. These will protect the US-Canada border, Alaska, Hawaii, and US territories in The Caribbean Sea.

Assembly of this Might is expected to take 6 months, starting now. Its Mission is to stop and prevent illegal flows of people and things from Mexico, Canada, and The Caribbean Sea into The USofA.

I request that, within this 6-month window you dismantle drug and smuggling operations operating on Mexican soil – to include their fiscal and legal logistical tails – terminate their leaders, to include purveyors of fiscal and legal logistics, and liquidate all their lieutenants, facilities, and soldier-operators. None of these deserves incarceration or preservation.

Please regard this Missive as a Warning Order to the effect that, if this task is not accomplished by the time the aforementioned US Field Armies are ready to roll, they will accomplish the task for you.

In addition, if such action is necessary, The USofA may annex as our state property such regions of Baja California, Chihuahua, Coahuila, Nuevo León, Sonora, and Tamaulipas as we determine increase our own safety.

We have no desire to harm Mexico. However, we are being harmed from Mexico. Decades of direct evidence have caused us to lose confidence that The Government of Mexico intend to stop that harm from coming to us. It will stop and not start again.

With sincere affection and well-wishes, I remain your obedient servant,

Donald J. Trump
President
The United States of America

A Triptych In US Military Redesign

The World Is Too Much

Prolegomena To Redesign Of US-American Military TOEs

Who Today Really Are Actual And Potential Enemies?

US-American Military TOEs - Part 1

From Inside The BRICS Gathering Of Nations

US-American Military TOEs - Part 2

Redesign For Homeland Defense

G7 and their constituent nations have flatlined. NATO and most of their constituent nations have flatlined. The powers of these organizations today are entirely destructive, nowhere constructive. The large majority of the world's population and the majority of the world's nations want them gone.

G7 nations have neither competencies nor capabilities to achieve peerage with the assets, architectures, or operating mechanisms — especially military ones — of the BRICS gathering of nations.

Today, the spiritual, moral, economic, and intellectual architectures of G7 nations epitomize the brutalist philosophy and political architecture of Euro-American [as distinguished from US-American] Globalism, which is allergic to national sovereignties because they obstruct Euro-Americans' loot of the wealth of nations.

God and the nations reject this political-economic-military architecture as unkind and careless, not what God wanted, and therefore not what nature long tolerates.

BRICS nations, led by three great powers — Russia, India, and China — build and expand an architecture of clarity and mutual benefit among sovereign nations, even nations of disparate power.

The USofA, a great power, must join the BRICS gathering of nations, put her shoulder to the common task of ensuring happiness through prosperity for each of the nations and all of their citizens all at once.

Homeland Defense, Required Force, US Combined Arms Army

	Corps	Division	Brigade	Regiment	Battalion	Company	Platoon
A US Combined Arms Army	Division	Sustainment Brigade	Sustainment Regiment	Sustainment Battalion	Sustainment Company	Sustainment Platoon	Sustainment Squad
	Division	ISR Brigade	ISR Regiment	ISR Battalion	ISR Company	ISR Platoon	ISR Squad
5 Corps d'armée	Division	Fires Brigade	Fires Regiment	Fires Battalion	Fires Company	Fires Platoon	Fires Squad
	Division	Engineering Brigade	Engineering Regiment	Engineering Battalion	Engineering Company	Engineering Platoon	Engineering Squad
Each Corps, Division, Brigade, etc.:	Division	Assault Brigade	Assault Regiment	Assault Battalion	Assault Company	Assault Platoon	Assault Squad

The five components of force — Space, Air, Fires, Sea, Land — distribute across formations of the US Joint Army. For example, Sea Force provides Fires, Sustainment, Intelligence (Cavalry), Engineering, and Assault force. Air Force provides Fires, Sustainment, Engineering, and Intelligence force. And so forth.

The US Joint Army must be an integrated Joint Force because the very components of force distribute across the human-built formations who are summoned to use them.

Except for Mexico, continental warfare is unlikely to occur on any but the Eurasian Continent. The USofA are unable to conduct continental warfare on either the Eurasian or African Continents.

Nor need we do.

Continental warfare on the American Continent is possible for The USofA. Canada, as a loyal subject of the English Crown, and Mexico would be the enemies in that event.

There must be copious opportunity
for junior Officers and NCOs to
demonstrate their mettle for
higher responsibility / rank.

In this respect, Company and Field Grade
formations are to The US Combined Arms Army
as farm teams are to major league sports teams.

Combat / Battle Groups are formed from Regiments expanded to Brigades.
Armies are formed from Corps.
Army Groups are formed from Armies.

Her Combined Arms Army Is The Effulgence Of The Nation

The Combined Arms Corps is the seed of The Combined
Arms Army.

The Combined Arms Division is the roots.

The Combined Arms Brigade is the lower, load-bearing trunk.

The Combined Arms Regiments are the upper,
resilience-giving trunks.

The Combined Arms Battalions are the branches.

The Combined Arms Companies are the leaves.

The Platoons are the fruits.

Colonels And Captains are the birds
singing from the branches.

Generals and Admirals are the light-giving sun and stars.

The General Staff are the Arborist.

Sustainment -- correlates with the Elemental Principle, **Space**

ISR -- correlates with the Elemental Principle, **Air**

Fires -- correlates with the Elemental Principle, **Fire**

Engineering -- correlates with the Elemental Principle, **Water**

Assault -- correlates with the Elemental Principle, **Earth**

25 Brigades	15 Brigades
125 Regiments	45 Regiments
625 Battalions	135 Battalions
3,125 Companies	405 Companies
15,625 Platoons	1,215 Platoons

There must be copious opportunity
for junior Officers and NCOs to
demonstrate their mettle for
higher rank.

In this respect, Company and Field Grade
formations are to The US Joint Army as
farm teams are to major league
ball teams.

The Joint Army Is The
Effulgence Of The Nation

The Joint Corps is the seed of The Joint Army.

The Joint Division is the roots.

The Joint Brigade is the lower, load-bearing trunk.

The Joint Regiments are the upper, resilience-giving trunks.

The Joint Battalions are the branches.

The Joint Companies are the leaves.

The Joint Platoons are the fruits.

Colonels are the birds singing from the branches.

Generals and Admirals are the light-giving sun and stars.

The General Staff are the Arborist.

Battle Groups are formed from Divisions or Corps.

Armies are formed from Corps.

Army Groups are formed from Armies.

Sustainment -- correlates with the Elemental Principle, **Space**

Redesign For Homeland Defense

We are a New World built on an Old one.
And that means Russia, Smartass.

We need a Clean Congress.
Make yourself useful.

The Rev. David R. Graham
The Friends Of West Point, '00
Ordination, Scottsdale Congregational UCC, '70

Yesterday, today, and tomorrow, Artillery (Fires) is The King of Battle. Fires, therefore, is the first priority of national defense planning and execution. Infantry is second.

Electricity is a Fires Force.

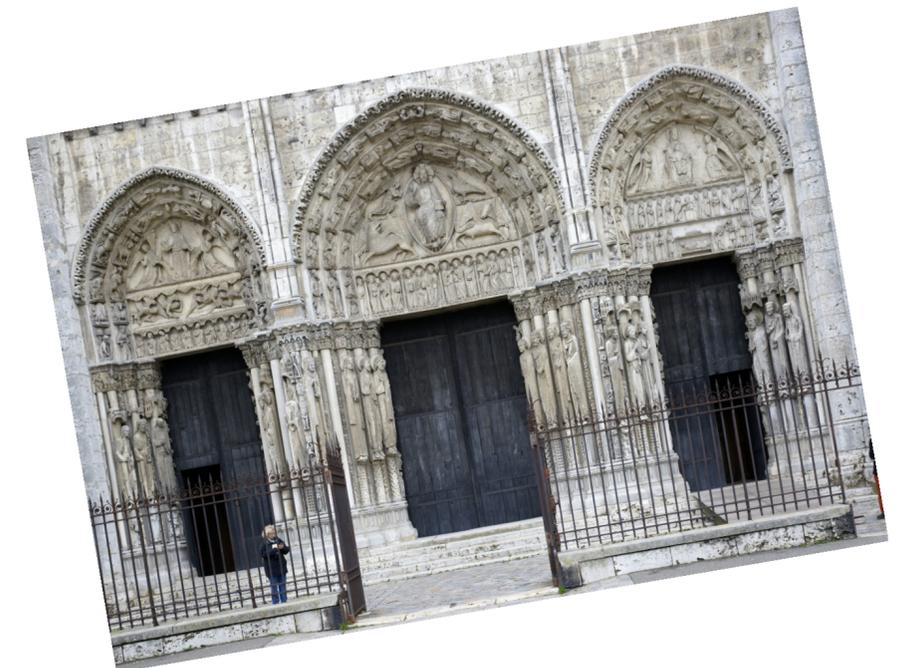

High-speed, high-precision, echeloned, low-cost, stand-off and loitering Fires have revolutionized the front line of a battlefield.

Fire Control demands
Engineering Competence.

A great power deploys their system of education to cultivate the Professional Guilds:
Theology, Medicine, Military Arts, Law, and Pedagogy.

Now

- 1- The front line of a great power stands outwards from their Chief Decision-Making Center rather than reaching inwards towards an enemy's Chief Decision-Making Center.
- 2- Doctrines and Grand National Existential Objectives are Forces of statecraft as well as of nature.
- 3- Their integrated Diplomacy, Finance, and War-Fighting Force is the battlefield architecture a great power brings to their conduct of multi-domain statecraft.

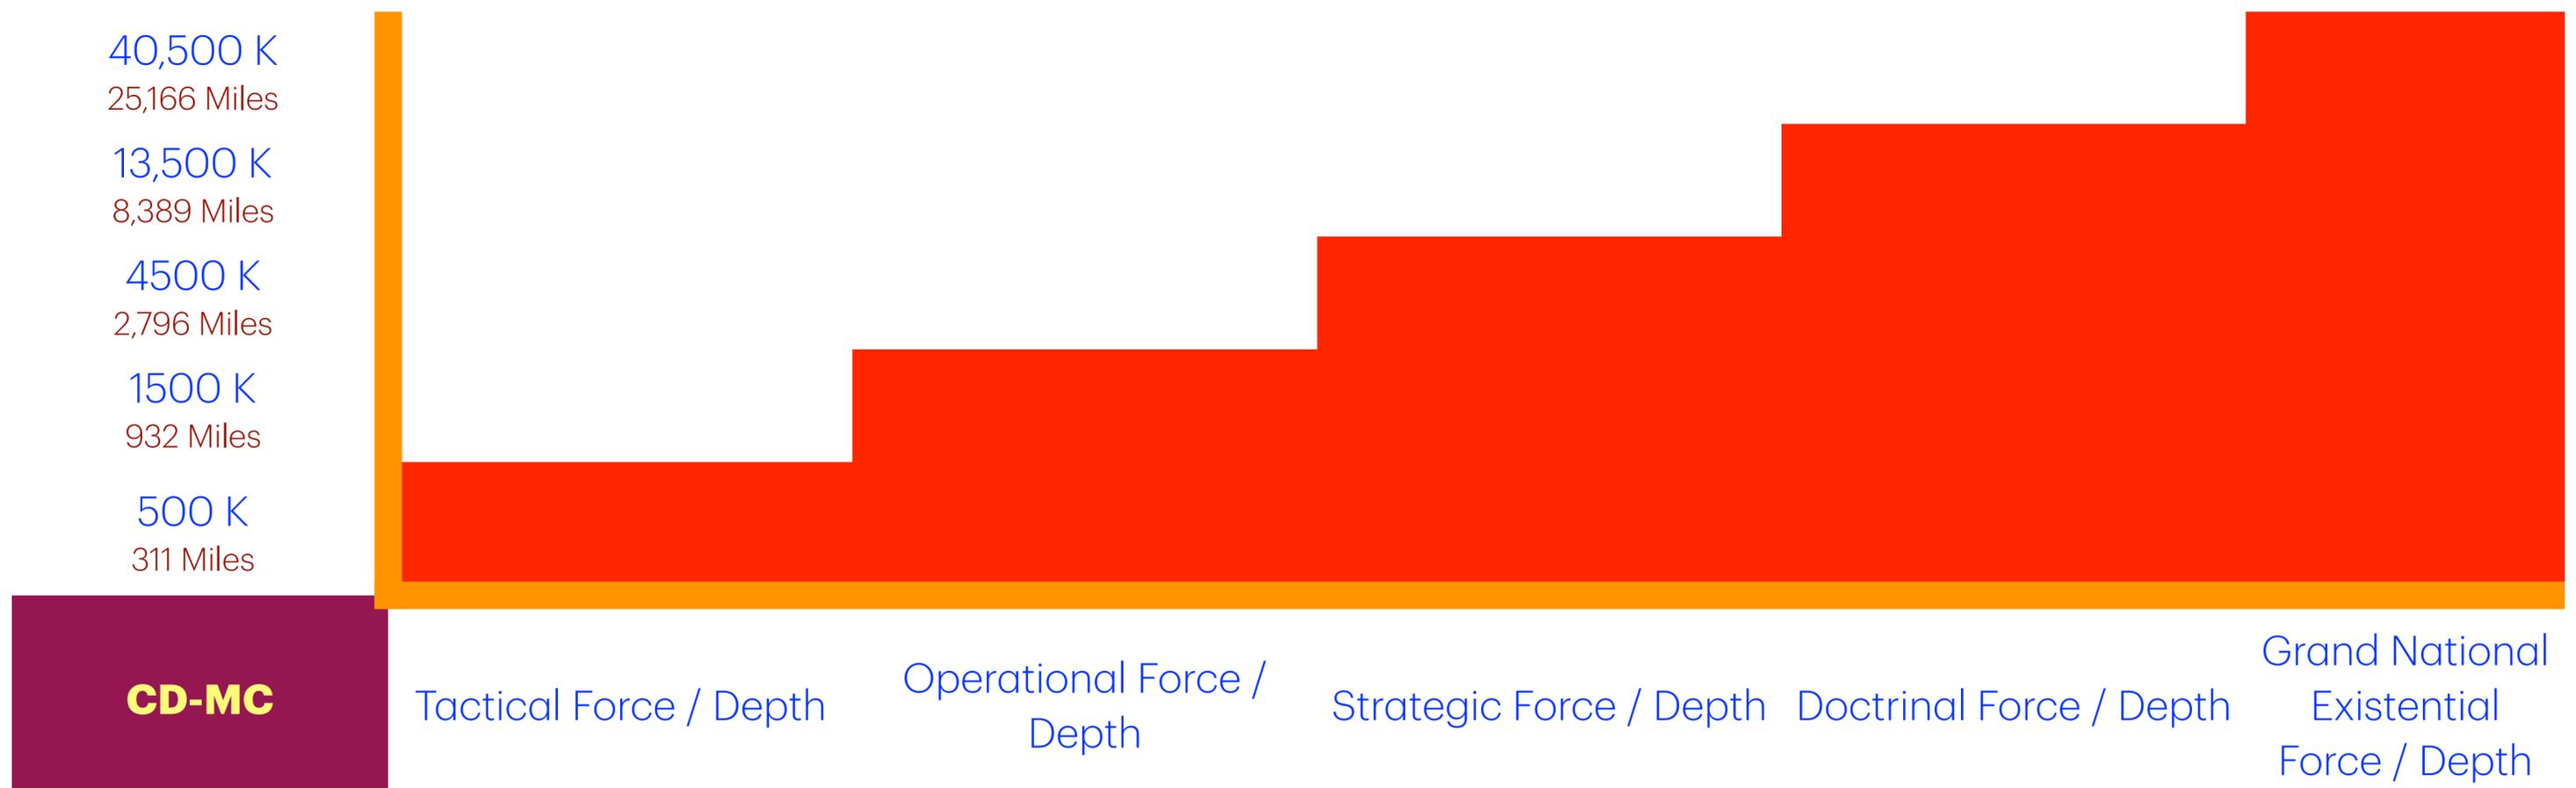

The West Door, Notre Dame de Chartres

Modern Great Power Battlefield Architecture

Today, the **front line** of a great power in armed conflict — includes by proxy — is that enclosing their **Chief Decision-Making Center** (CD-MC). **That** line, no matter the areas into and over which curses and munitions fly at the moment, is the **front line** of the battlefield architecture of a modern great power in armed conflict.

The **thickest** front line is the **most protective** front line. **Thickness** increases with the distance a front line projects forward, omni-directionally, from its CD-MC.

A Modern Captain fights first at the Depths of his Doctrinal and Existential Forces. Success there guarantees his victory. To fight first at the Depth of his Strategic Force obliges a Modern Captain to consider victory uncertain. If compelled to fight at his Operational Depth, a Captain nears defeat. Reduced to his Tactical Depth, defeat is his.

The main advantage of the Russians [in the SMO] is that the way they fight and the weapons they bring to the fight are **consistent** with their doctrine on warfare and their strategic objectives. When doctrine or objectives change, weapons and the way they fight must change with them. When weapons and the way they fight change, doctrines and objectives may change with them. The point is, regardless of conditions, through the vicissitudes of time and clime, Russians maintain **consistency** between the way they fight, their weapons, their doctrine, and their strategic objectives. This internal **consistency** — a spiritual consistency — is their strength. Russian systems of education and industry require to provide them means to maintain their consistency in affairs of state. Everything and everyone subordinate to Russian national strategic welfare. This phenomenon powers the Russian Civilization-State. It is Dharmic.

As I observe developments inside and beyond our nation's borders, I am convinced an era of one-power, one-ideology dominance passes ungraciously in fire of its own making, and an era of getting along by the practice of universal and traditional principles of statecraft — mutual respect, peaceful coexistence, mutually beneficial cooperation — emerges heroically from the conflagration, to put it out. Homeland defense is in, transnational domination is out.

Statecraft is differential equations, an engineering enterprise, not a sporting event, not a ballgame, nor a chess match. We have interlocutors in all domains simultaneously, using multiple frequencies on indeterminate timelines, not allies, partners, or competitors struggling with one another on familiar playing fields level or not.

The U.S. military strategy of dividing the world into combatant commands is a colonial-style paradigm that has finally exhausted itself, Kwiatkowski said.

Ivan Ilyin

Russia can be restored only by serving it faithfully and substantively, which must be felt and understood as serving the Cause of God on earth. We must be guided by religiously meaningful patriotism and religiously inspired nationalism.

True nationalism opens a person's eyes to the national identity of other peoples: it teaches one not to despise other peoples, but to honor their spiritual achievements and their national feeling, because they too have received the gifts of God, and they put them to use in their own way, according to their ability.

Whoever loves Russia must wish it freedom; first of all, freedom for Russia itself, its international independence and freedom; [then] freedom for Russia as the unity of Russian and all other national cultures; and, finally, freedom for Russian people, freedom for all of us; freedom of faith, [freedom in] the search for truth, creativity, labor, and the possession of property.

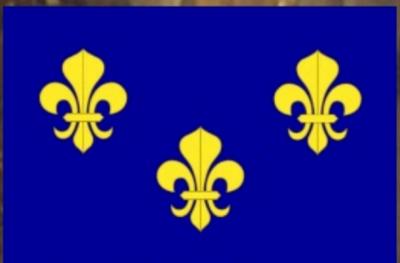

Ukraine is recognized as the most endangered part of Russia in terms of secession and conquest. Ukrainian separatism is an artificial phenomenon, it has no real grounds. It arose because of the ambition of leaders and international conquest intrigues.

Foreigners who plan to dismember [Ukraine] should remember that they declare eternal war on the whole of Russia. The country that is responsible for this dismemberment will become Russia's most hated enemy.
